

987/981 BRS Solid Transmission Mounts replace the non-active rubber or active transmission mounts as found in 986 through 981 with a full solid setup to minimize drivetrain movement and flex. Mounts fit all 986/987/987.2/981/GT4 Boxster and Cayman 1998-2016. Orientation and mounting holes use differs between models - refer to the guide below. **We don't recommend coupling the 987/981 BRS Solid Transmission Mounts with a solid engine mount due to harmonics and excessive vibration.**

### INSTALLATION IN 986 / 987 MODELS

### INSTALLATION IN 981 MODELS

**Recommended Installation:** We recommend removing the black transmission bracket entirely and installing the mounts as an assembly outside of the vehicle. This will give much better access to tighten the transmission mount. **Support the transmission properly when removing the mounts. Torque all bolts to factory spec.**
